

Meyer® Turbo Broom™

Commercial-Grade Walk-Behind Rotary Broom

The Turbo Broom is a high-performance, multi-seasonal broom, ideal for high traffic walkways, paths and drive-ways. Its high-speed rotary brush reduces the chance of slip and fall incidents by removing snow and thin ice from surfaces. Ideal for paver and other textured surfaces as its durable poly bristles penetrate nooks and crannies that snow throwers, shovels and hand brooms can't reach.

Broom Features

- 36" wide broom with durable hood cover that is built to last
- 200 RPM broom speed
- Hydrostatic transmission with hand grip variable speed controls
- Control lever allows broom to be manually adjusted 30° left or right of center (0°), with lock pin to hold broom position
- Kohler Command PRO 16.9 in³ (277 cc), 9.5 HP, all-season gas engine with electric start
- Adjustable casters to set broom height and eliminate premature brush wear
- Independent control levers allow you to engage and disengage the broom at any point of operation
- Heated hand grips for comfort during winter maintenance
